

Student Name : _____
 Student Number : _____

Grade Band	Content	Structure	CSS Rules	Project Structure	Design
Baseline	3 – 5 Pages (Completed)	Well Formed (Completed)	Concise and Efficient Demonstrate use of the box model (Completed)	Basic Readme (Completed)	Consistent use of appropriate fonts and colour (Completed)
Good	5-7 Pages (Completed)	Consistant indentation Effective use of divisions, classes/Ids (Completed)	Multiple stylesheets, some reusable (Completed)	Readme with source attributions (Completed)	Each page having a distinct theme/logical flow of content (Completed)
Excellent	7+ pages (Completed)	Context Sensitive Navigation (Completed)	Grid (Completed)		Integrated, legible, clear & consistent design (Completed)
Outstanding			<i>Flexbox (for navigation, independent learning)</i> (Completed)		More sophisticated colour usage (Completed)

Additional Notes:

Techniques you have employed in the project that you have acquired independently. Short notes in each technique/technology:

1. Flexbox. I have used it in the navigation as well as the timelines on the Charlotte, Emily and Anne Pages, switching the default main and cross axes
2. Used the CSS repeat function when defining grid-template-columns
3. Used the shorthand syntax for defining column start end i.e start / end;
4. Used quote styling which I learned from MDN
5. Used custom fonts from google fonts
6. Validate the HTML and CSS pages using the W3C online validators

The readme has references to all the places where I learned these techniques
